Judging by the Tweets, Emails and casual conversations I receive, the economy still sucks, especially if you are an unemployed, under-employed or unhappily employed Recruiter. Not too long ago, I gave a few tips on [how Recruiters can find hidden job opportunities](#) during a recession. Well, here are a few more. I have created a series of search strings that you can use to find hidden opportunities using the Google search engine. They will also work on Live and Yahoo, so feel free to try your luck there as well. As a treat, I am going to share with you search strings that I created manually and those that were made with the use of an automated tool. First, the manual strings. **Enjoy...**

Need a position with great benefits?

["excellent benefits" intitle:recruiter \(intitle:job OR intitle:jobs OR intitle:careers\) \(apply OR submit OR eoe\)](#)

Need more search strings than the ones shared above? You may want to check out a Sourcing tool that I recommend to all of my Recruiter friends "[Resume Finder](#)." If you are a Recruiter too busy to source or a Sourcer with too many reqs to source for, I highly suggest that you try this tool out. I will be going into more detail about the fantastic tools available from [eGrabber](#) in the very near future. For now, check out some of the results I was able to create in moments using eGrabber's [Resume Finder](#) tool to locate Recruiter jobs on the web.
